

Pinnacle
Restaurant Manager

Run your restaurant. Know your numbers.

AI-powered operations for independent restaurants — POS, kitchen, menu engineering, payroll, purchasing, and a 12-tab analytics suite in one platform.

Seed round · \$750K · \$79–\$449/location/mo · Live embedded demo

Command Center — Live

Sales
\$24.8k

Profit
\$4.2k

Labor
31.2%

You asked:
What's hurting my profit this week?

Labor

 Labor cost **high** for volume

Waste

 Waste eroding margin

Vendors

 Vendor prices rising

POS · Table 12

Brisket ×2	\$38.00
Mac & Cheese	\$7.50
Total	\$51.50

Invoice OCR · matched

FENBA01	\$58.20
BROBU10	\$101.85

Independent restaurants lose 10–15 hours every week reconciling tools that were never built to work together

Fragmented stack

POS, scheduling, inventory, and accounting don't share one source of truth.

Margin leaks

Food cost and labor drift go unnoticed until month-end — when it's too late to fix.

Menu chaos

POS, delivery apps, and QR menus drift out of sync — pricing and 86s become manual fire drills.

Owners can't ask "**what's hurting profit this week?**" in plain English — they export CSVs and guess.

One million US locations — 70% independents — and almost none have unified ops plus live BI

1M+

US restaurant locations

70%

Independents & small groups

\$12B+

Restaurant software TAM

<15%

Unified ops + AI BI penetration

Enterprise POS wins the register

Toast & Square are strong at checkout — weak on rolled-up intelligence for owners.

Point solutions multiply cost

Scheduling, inventory, and BI each add \$100–300/mo and integration debt.

AI creates a wedge

Operators want answers from *their* data — not generic blog advice.

Pinnacle replaces six disconnected tools with one workspace from the lunch rush to month-end P&L

Serve & sell

POS · KDS · tableside QR · Square/Stripe payments

Menu as asset

Sub-recipes · 6-channel sync · engineering matrix

Run the business

Payroll · purchasing · invoice OCR · integrations

Know the numbers

12-tab analytics · AI Command Center · 350+ questions

Cross-domain insight

Labor + waste + vendor price drift = margin leak this week

Suggested: trim Tuesday prep · renegotiate produce bid

Twelve in-app modules — AI synthesizes answers across all of them

David Foy built and shipped the production platform — operator pain, full-stack execution, and founder-led sales

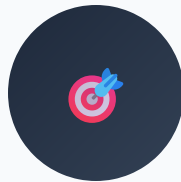

David Foy

Founder & CEO · Product & Engineering

Operator-first builder behind Pinnacle Designs LLC. Owns product vision, customer discovery, and the full stack from signup through payroll.

- Shipped live SaaS: self-serve billing, embedded demo, 50+ API domains
- Built invoice OCR, 3-way match, AI Command Center on production data
- Stripe + Square Connect · multi-tenant security · Vercel production deploy

Domain depth

Restaurant operations · SaaS GTM

Deep empathy for independent operators — fragmented POS, spreadsheet payroll, and month-end surprises that Pinnacle replaces.

- Founding-10 program · embedded live demo · PWA install
- Pitch pipeline, admin review, and reference-customer motion in place
- Seed use-of-funds weighted to convert demo traffic into paid locations

First key hire

Head of Customer Success · Month 3

Convert marketing-site demo traffic and founding-operator cohort into reference accounts and expansion revenue.

- Onboarding playbooks · weekly business reviews with operators
- Outbound to 2–10 location groups upgrading from POS + spreadsheets
- Funded by seed GTM allocation (\$300K)

Advisor bench (restaurant ops, SaaS finance, payments) — names available on request.

Only Pinnacle combines native POS, six-channel menu sync, 12-tab analytics, and AI on live data — with a demo that sells itself

Capability	Legacy POS	Point solutions	Pinnacle
POS + recipe-aware KDS	Strong	Separate vendor	✓ Native
6-channel menu sync	Add-ons	Manual	✓ One source of truth
12-tab analytics	Basic reports	BI export	✓ In-app, live
AI on operational data	Rare	None	✓ 350+ questions
Self-serve + embedded demo	Sales-led	N/A	✓ Minutes to value

SaaS per location delivers \$79–\$449/mo ARPU with natural expansion to multi-unit Group plans

Starter

\$79/mo

Dashboard, menu, tables, basic inventory · 3 users

Growth

\$249/mo

KDS, menu engineering, labor, standard AI · 10 users

Pro

\$449/mo

Full analytics, purchasing, integrations, payroll · 25 users

Group

\$599+ \$249/loc

2–10 locations · roll-up reporting

The platform is deployed, billing-ready, and demoing on the public marketing site today

✓ Live product

Vercel production · self-serve signup · onboarding wizard · embedded demo

✓ Payments

Stripe subscriptions · Square & Stripe Connect for guest cards

✓ Full demo workspace

Seeded orders, staff, analytics — Smoky Oak BBQ reference tenant

✓ Investor pipeline

Public pitch request flow · admin review · private deck delivery

Seeking founding operators to convert demo interest into paid locations and case studies.

Our founding-10 program locks early adopters at \$149/mo for life and generates referrals
